

## WVARA Field Day, 24-26 June 2016

More Information: [www.wvara.org](http://www.wvara.org)

**WHAT:** Field Day is a great opportunity to get outdoors, gain experience assembling equipment in the rough, and operate a station under challenging band conditions. This year we will operate QRP (low power, 5 watts max) in the 12A Battery category with phone, CW, and digital HF stations as well as a satellite ground station, a Get On The Air station for visitors, and multiple VHF/UHF stations. To see details on our site last year, refer to: <http://www.arrl.org/soapbox/view/9234>

**WHERE:** This year's Field Day operation will be at the top of Mora Hill located in the San Antonio Open Space Reserve near the Magdalena exit off of Highway 280 in Los Altos Hills. This site overlooks the Silicon Valley from an elevation of 500 feet

**WHEN:** We will be setting up on Friday, June 24. Field Day operations officially begin Saturday, June 25, at 11am and continues until 11am Sunday. Our goal is to keep all of the HF stations in operation the full 24 hours. Tear-down and packing activities will probably last from 11am until about 2pm Sunday afternoon.

If you have any questions, you can reach us via [CQFieldDay@gmail.com](mailto:CQFieldDay@gmail.com).

Parking at the Field Day site is limited. Parking at the site is limited to those with physical handicaps or vehicles carrying heavy equipment. For others, we recommend parking down the hill on nearby streets.
